

Schunk RGG Cleaning Device

Do you still waste time by cleaning your machines' working range manually via an air pistol? Optimize your productivity with our new Schunk RGG cleaning device. Its joint diameter of 20 mm fits into classical tool holders so you can integrate our Schunk RGG into your automated process of machining. Eight nozzles on the ballhead blow out a powerful jet of air or cooling lubricant which is provided through a supply feed in the shaft of the cleaning unit. You can easily reach every corner of the workroom by moving and rotating the tool-spindle. Beside the reduced threat of flying chips or sprayed cooling lubricants for the operator you additionally could save significant time with the Schunk RGG. In consequence you have more scope to concentrate on the actual value creation.
