

## Option Anti-corrosion

Optional corrosion protection is available for use of the standard grippers PGN-plus and PZN-plus in corrosion-susceptible environments. In this standard option, however, only the base jaws and the inclined piston are provided with a DLC coating.

### Application:

- For applications in environments susceptible to corrosion

| Additional benefits                                                    | Additional expense                                                                               |
|------------------------------------------------------------------------|--------------------------------------------------------------------------------------------------|
| <ul style="list-style-type: none"><li>- Corrosion protection</li></ul> | <ul style="list-style-type: none"><li>- Additional coating of the base jaws and piston</li></ul> |

### Note:

- The available anti-corrosion option applies only to pistons and base jaws
- Option applies only to PGN-plus and PZN-plus; available as modification for other grippers or finger attachments
