

Hygiene regulations for Roadshows

We would like to kindly advise you to follow the known hygienic rules which also apply for the roadshows.

You will find a “box with hygiene products” in the roadshow bus containing all necessary things to implement the mandatory hygienic measures.

Minimum distance and hygiene rules

Maintain the minimum distance of 1.5 m and regularly wash your hands.

Wear a mask

In the “box with hygiene products” you will also find masks for you and your customers. Wear them and place them visibly for the customers at the entrance area.

Desinfectant

You will find desinfectant in the bus. Please put it next to the masks at the entrance area of the roadshow.

Please regularly disinfect frequently used surfaces and make sure that the products will not be touched. Never use desinfectant to disinfect the products.

List of participants

Please lay out the list of participants and enough ballpoint pens, so that every customer can register his name in the list. Make sure that there is a separate ballpoint pen for each customer! In case of an infection this list will help us to trace the infection chains and to inform every participant.

The lists of participants will be stored for four weeks and will be then destroyed. Please put the lists after the roadshow into the folder “completed documents,” and put the folder into the roadshow bus.

Individual measures when visiting companies/ an Intec

When you are planning a roadshow, please inform yourself in advance about the applicable hygienic rules of the company to be visited.

**Verzichten Sie aufs Hände
schütteln, schenken Sie
ein Lächeln**

*Avoid shaking hands.
Give a smile instead*

**Hände mehrmals täglich
gründlich waschen**

Wash your hands thoroughly

**Vermelden Sie Berührungen
Im Gesicht**

Avoid touching your face

**Halten Sie den Mindestabstand
von 1,5 Metern ein**

*Maintain a minimum distance
of 1,5 meters*

**Tragen Sie bei Unterschreitung des
Mindestabstandes eine Maske**

*Wear a mask if the minimum
distance is not observed*
