

MPG-plus with cover

Benefit arguments

Internal use only – internal use only – internal use only – internal use only – internal use only – internal use only – internal use only – internal use only

Superior Clamping and Gripping

The most important advantages at a glance

Technical feature	Advantage	Customer benefits	User group
MPG-plus as a technical basis	Known and proven technology	→ Low risk due to proven technology Gripper base modifiable for numerous applications → Low acquisition cost	Construction Standardization Project lead Production planning Purchasing Sales
Retrofittability	Machines and systems with MPG-plus can be retrofitted	→ Low effort for reconstruction Grippers can be further used → Low acquisition costs	Construction Standardization Project lead Purchasing
FDA suitable materials	Use in Food/Pharmaceutical/Medicine “Gray rooms”	No expensive customized constructions → Low risk due to FDA suitable materials → Low costs due to FDA suitable materials → Time saving due to FDA suitable materials	Construction Standardization Project lead

Internal use only – internal use only – internal use only – internal use only – internal use only – internal use only – internal use only – internal use only

The most important advantages at a glance

Technical feature	Advantage	Customer benefits	User group
IP 54	High protection of the gripper	→ Reduced risk through better protection → Lower costs due to longer lifetime	Construction Standardization Project lead Purchasing
Cleanroom class	Customer does not have to look at the gripper during certification	→ Time savings through simplified certification → Cost savings due to simplified certification	Construction Standardization Project lead
