

Hand in hand for tomorrow

Product data sheet

Feed-through modules COS JBx

Robust. Reliable. Flexible.

Optional modules COS

Optional modules for feeding through different media such as electrical signals, pneumatics, fluids and vacuum.

Field of application

For fast media transfer with short change-over times between change master and change adapter in order to supply the end effector with the required media.

Advantages – Your benefits

Fits perfectly for easy combination with SCHUNK tool changers

Wide range of different variants for feeding through of various media

Module variety the appropriate module for the required media transfer for every size of SCHUNK tool changers

Connector variants with radial, axial, and side cable outlet for a low interfering contour in restricted spaces

Combination of several optional modules for maximum flexibility of the tool changer

Minimum wear for a high number of change cycles and a long service life

Customer-specific designs available on request the suitable solution for any application

Cable connector, cable extensions and protection covers available on request for a comprehensive complete solution from one source

Application example

① Automatic tool changers CPS

③ Modular storage rack CTS

⑤ 2-finger parallel gripper JGP-P

② Optional modules COS

④ Universal gripper EGU

SCHUNK offers more ...

The following components make the product even more productive – the suitable addition for the highest functionality, flexibility, reliability, and controlled production.

Tool changer

Manual change system

Pallet change system

Special designs with modified seals or lubrication are available on request

Technical data

Description		COS JB2-K	COS JB3-K
ID		1586302	1586303
Suitable on		Change head	Change head
Screw connection diagram		L1	L2
Weight	[kg]	0.75	0.84
Min./max. ambient temperature	[°C]	5/60	5/60
Outlet connection		tangential	tangential
Type of medium		Air	Air
Max. operating pressure	[bar]	6.9	6.9
Special properties		Pneumatic connection (2 x G1/4") when using with external, customer-side valve.	Pneumatic connection (2 x G1/4") when using with external, customer-side valve.

① When using a pneumatic control module on the CPS-K on side A, the distance plate COS Z50-A-LD, ID 1584093, is also required on the CPS-A.
