

READY. STEADY. GROW!

Boosting productivity
in three steps

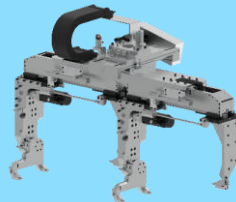

4 Levels of Partnering – SCHUNK offers more!

1st Level

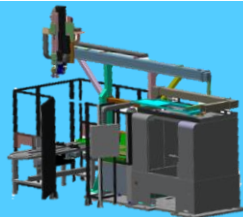

Standard components,
modified standard components

2nd Level

Configurable products, gantry systems and
assemblies with custom interfaces

3rd Level

Gantry systems and assemblies with
defined interfaces to customer machines,
including steel framing, safety fences and
electrical cabinet

4th Level

Delivery of complete systems including
hardware and software.
Process responsibility for the system at
SCHUNK.

We are the partner for automation!

We know and understand the challenges in the market.

- ✓ **Reducing the workload on skilled workers – increasing productivity**
We show you how you can increase your productivity with your existing staff
- ✓ **Focus on economic efficiency**
Investments that have been proven to pay off with an attractive ROI
- ✓ **Step-by-step implementation**
from on-site consulting and feasibility analysis in a real test setup to implementation, **everything from a single source!**
- ✓ **Tried and tested**
Solutions that are also used in our own production and are not just planned in theory

→ Automation that pays off – technically useful & economically feasible

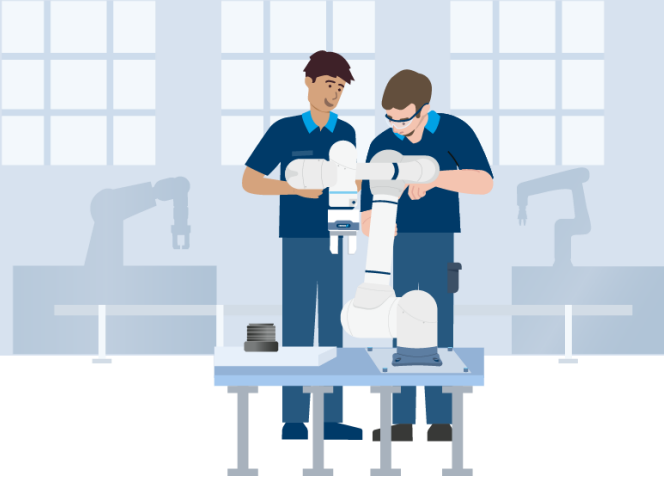

Our Process

READY.

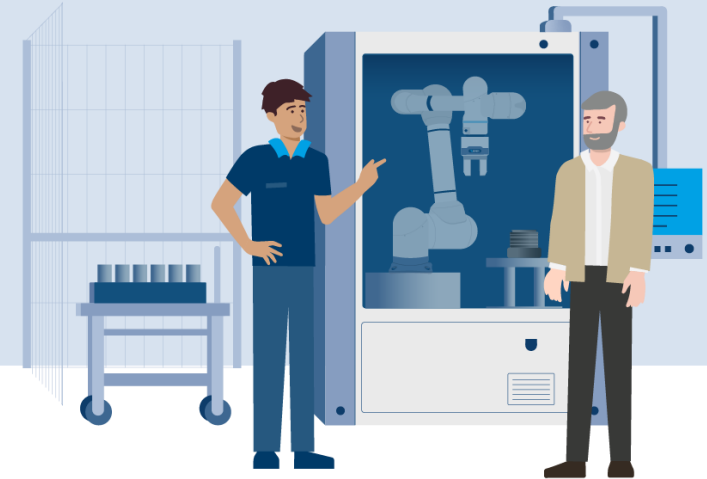

Conducting on-site workshops with the customer to jointly identify automation potential within their production processes.

STEADY.

We support with feasibility tests of your applications to minimize the technical risk.

GROW!

We support the customer in implementation using our flexible and standardized automation cells.

READY.

As an experienced automation and production specialist, we support other companies in making industrial processes more **efficient, transparent, and sustainable.**

Together, we thoroughly analyze the existing processes and identify potential areas for automation.

The identified opportunities are then evaluated together with the customer and, if necessary, validated in our CoLabs.

STEADY.

CoLabs validate your application

Individual

validation of your application,
including a test report

Over **2.500** 
validated applications

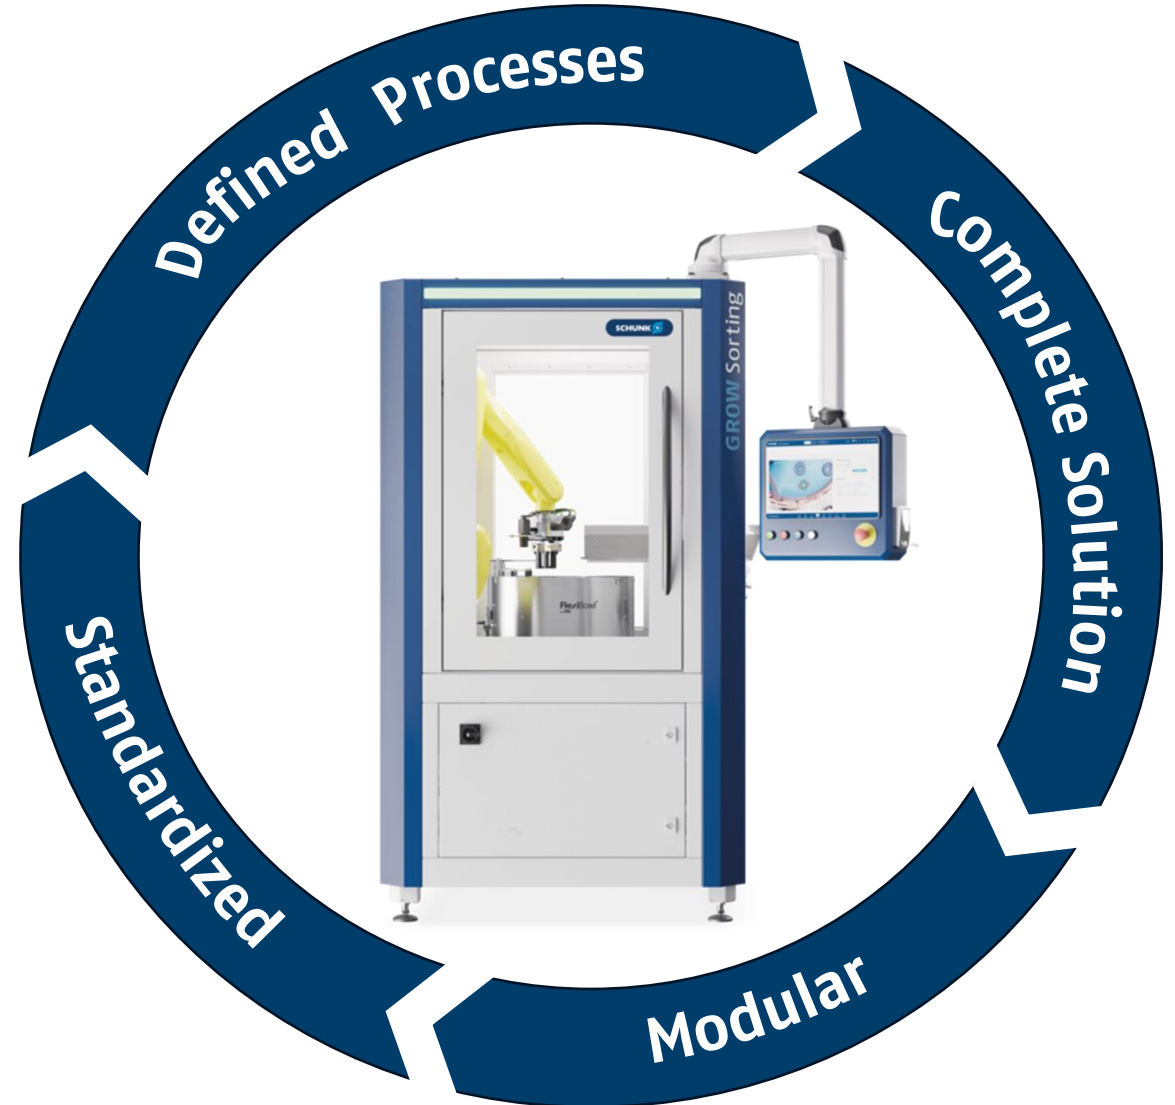

- + Feasibility assessment and documentation by application experts.
- + Live presentations of automated processes

Over **400** 
visits and workshops

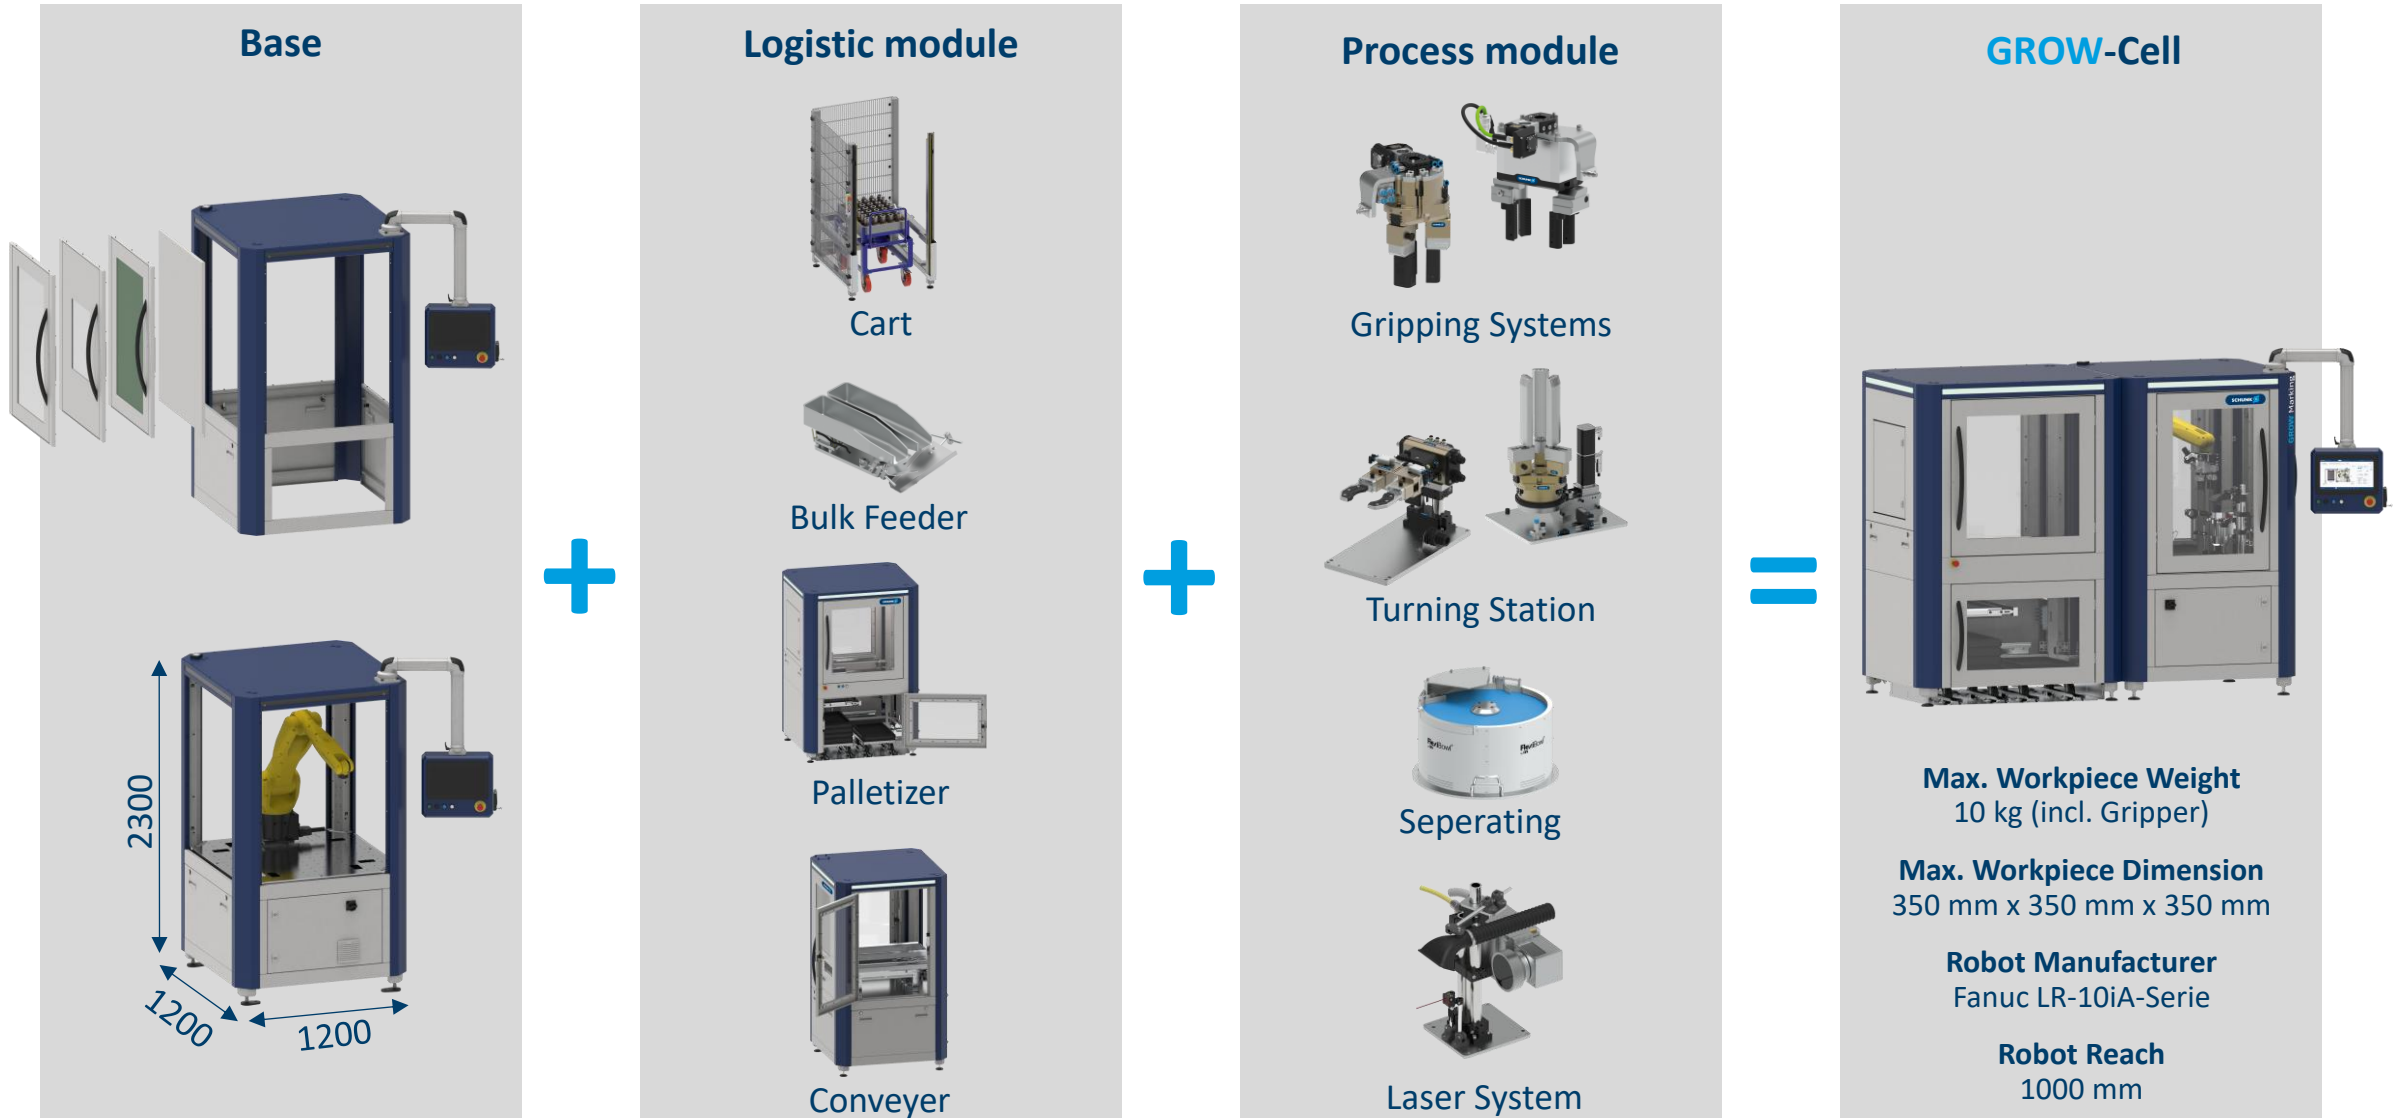

GROW!

Unleash the full potential of your company now.
With SCHUNK's **GROW** automation cells!

- ⊕ Stand-Alone solution with CE-certification
- ⊕ Intuitive user interface
- ⊕ Attraktive Return On Investment
- ⊕ Prooven premium components
- ⊕ Including validation

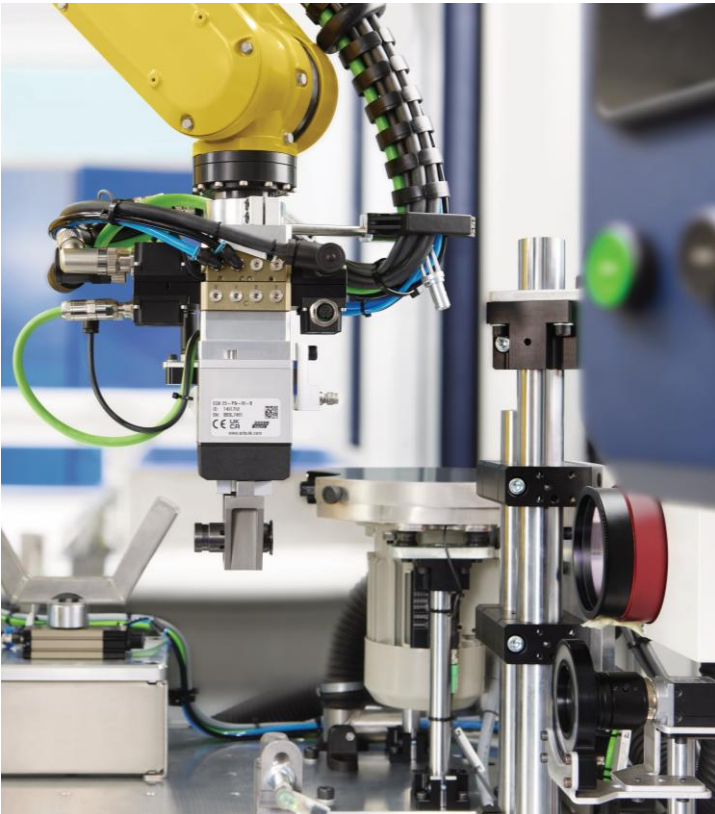

Modular Concept – Individually adjustable

① The logistics and process modules shown are examples from our standard portfolio. Choose from a wide range of other modules to design your individual solution.
